

Application of DONAHUE - Serial No. 09/610,005

~~43. A computer programmed with computer software that carries out steps (1) to (5) of claim 38.~~

A₁ 44. The computer-assisted method of claim 38, wherein step (2) comprises the step of receiving a first ancillary value from the first negotiator representing a first proposed contract value corresponding to one of the predefined agreement provisions; wherein step (4) comprises the step of receiving a second ancillary value from the second negotiator representing a second proposed contract value corresponding to one of the predefined agreement provisions; wherein the method further comprises the step of:

(6) if the first ancillary value and the second ancillary value are different, generating a message identifying a discrepancy.

45. The computer-assisted method of claim 38, wherein step (2) comprises the step of receiving a first ancillary value from the first negotiator representing a first proposed contract value corresponding to one of the predefined agreement provisions; wherein step (4) comprises the step of receiving a second ancillary value from the second negotiator representing a second proposed contract value corresponding to one of the predefined agreement provisions; wherein the method further comprises the step of:

(6) if the first ancillary value and the second ancillary value are different, proposing a third ancillary value representing a compromise between the first ancillary value and the second ancillary value.

46. A computer readable medium storing computer readable instructions that, when executed by a processor, cause a computer to perform steps (1) to (3) of claim 36.

47. A computer readable medium storing computer readable instructions that, when executed by a processor, cause a computer to perform steps (1) to (5) of claim 38.

Remarks

New claims 30-47 have been added. These claims are generally directed to a computer-
